

Great sound for when the top's always down.

From the most respected name in car audio comes the Infinity Marine 622m Speakers. Designed to boost your performance while out on the open waters, these weather-protected speakers are designed to cut through noisy engines, loud swells and anything else Mother Nature throws your way. With Plus One™ woofers and balanced-dome tweeters, you'll hear the clarity of your audio as if you were in your home. And because they feature a one-piece cast-polymer basket, a sealed magnet, and rubber surrounds, they're ready to hold up against the sun, sea spray and scrub downs.

Features

- ▶ Plus One™ woofer cones
- ▶ Balanced dome tweeters
- ▶ Designed for the elements
- ▶ Individually voiced
- ▶ OEM-level reliability testing

INFINITY MARINE 622m

Infinity sound made for the sea

Plus One™ woofer cones

Harman's patented (US patent #7,548,631) Plus One™ polypropylene cones provide more overall speaker-cone area than other cones in its class – the result is higher sensitivity, increased low-frequency output and greater musical character.

Balanced dome tweeters

Weather resistant tweeters deliver a smooth high-frequency response and increased power handling for highs and mids, which equates to more lifelike sound from vocals, cymbals, brass instruments and pianos.

Designed for the elements

Their one-piece polymer basket is designed to stand the test of time, even after long exposure to the sun and salt. Rubber surrounds offer superior edge protection and are much more reliable than foam. And a grille-mounted tweeter allows the front of the woofer cone to be sealed, protecting the motor structure from sea spray.

Individually voiced

For most brands, off-the-shelf speakers and a cursory approval of frequency response curves are good enough. That's not the case with Infinity, the world's top-selling car speaker brand. We don't only listen to our speakers against the competition – we voice them against each other to ensure each line has the consistent Infinity sound signature car audio enthusiasts have come to know and love. This is just part of an extensive development process undertaken by some of the best transducer engineers in the world to provide the finest listening experience at any price point.

OEM-level reliability testing

Infinity tests every speaker design to rigid specifications, subjecting them to extreme conditions that would break lesser speakers – this is ideal for equipment that will be heavily driven in the elements. We freeze them, bake them, shake them, blast them with ultraviolet light and drive them at full power for days to make sure your audio investment lasts for years.

What's in the box:

- Marine speakers
- Stainless steel mounting hardware
- Mounting gasket
- Screw clips
- Owner's manual

Product specifications:

622m

- ▶ Type: 6" (160 mm) Two-way marine speaker
- ▶ Peak power handling: 225W
- ▶ Power handling, continuous average: 75W
- ▶ Frequency response: 50Hz–20kHz
- ▶ Nominal impedance: 4 ohms
- ▶ Sensitivity (2.83V/m): 92db
